

1. remove
2. ignore
3. mark as visited
4. self work
5. A-II unvisited node

```
public int find(int v) {
    Node node = map.get(v);
    return find(node).val;
}

private Node find(Node node) {
    if (node.parent == node) {
        return node;
    }
    Node n = find(node.parent);
    return n;
}
```
